APPLICANT : MITSUI CHEMICALS INC;

INVENTOR : SUDA SATORU;

INT.CL. : G11B 7/24 B41J 2/01

TITLE : DRAW TYPE OPTICAL DISK AND  
PRINTER CAPABLE OF PARTIAL  
PRINTING

ABSTRACT : PROBLEM TO BE SOLVED: To provide a DRAW type optical disk, as well as a printer suitable for this disk, capable of efficiently displaying both common design and individual title on a label without impairing the function possessed by the DRAW type optical disk.

SOLUTION: The DRAW type optical disk is provided with a design print part 1 arbitrarily selected on the label surface of an optical disk, a part 2 with an ink composition printed that accepts the printing ink of an ink-jet printer, and a marking part 3 which is in a specific positional relation with the design print part 1 and which is detectable by a sensor, and also, the ink-jet printer is provided with a part for holding the optical disk, a sensor for detecting the marking part, a controller that synchronizes with the signal of the sensor and that controls the rotation of the holding part, and a printing part for printing on the part with the ink composition printed.
